

Magnacool Metal Cleaners

Product	Description	pH 3% solution	Use Concentration (%)	Temp °C	Cleaning Method	Work Metrial
Aquaclean 1	This alkaline liquid cleaner effectively removes cutting fluids, grinding fluids, and general shop soils. It is suitable for cleaning stainless steel, copper, aluminum, and zinc alloys, while also providing short-term, in-house rust protection.	9.8	4% -10%	Ambient - 60°C	Dip, Spray	Ferrous/ Aluminum
Aquaclean 2	This cleaner efficiently removes shop soils, including soluble coolants, cutting oils, and other lubricants. Designed for use in spray washers with high-pressure nozzles, it provides excellent corrosion protection. Economical and versatile, it's an ideal solution for all your metal cleaning needs.	10	3% - 5%	Ambient - 60°C	Dip, Spray	Ferrous/ Aluminum
Aquaclean -3	This specially formulated product is designed to tackle tough dirt and scale on the surface of ferrous metals. Its advanced formula selectively dissolves contaminants without affecting the clean metal beneath.	10	5% - 10%	Ambient	Dip, Spray	Ferrous
