

Magnacool EDM Fluids

Product	Description	Appearance	Density	Flash Point °C	Application
EDM Fluid M82	Low-flash-point EDM fluid optimized for efficient electrical discharge machining, ensuring precise results and stable performance in sensitive operations.	Colourless & Transparent	0.76	82	All electro-discharge machines that work by penetration. suitable for roughing, finishing and super finishing work.
EDM Fluid M102	Medium flash-point EDM fluid designed for stable performance, ensuring precision and effective cooling during electrical discharge machining.	Colourless & Transparent	0.78	102	
EDM Fluid M132	High flash-point EDM fluid offering superior safety, stability, and performance for precision electrical discharge machining operations.	Colourless & Transparent	0.8	130
